The Animal Health Field Staff are key components in safeguarding the livestock and poultry of West Virginia. Some of their many responsibilities are:

- The examination of animals for signs of disease at markets, fairs and festivals, as well as on the farm
- Inspection of health certificates and appropriate paperwork for animal movement.
- Emergency response to disease outbreaks.
- Ensuring traceability regulations are followed for faster response and traceback times.

*Prevent, Suppress, and
Control Communicable
Diseases of
Livestock and Poultry*
